

amino5

ACBS GMS PBS

Description

Food for special medical purposes.

MMA/PA amino5 is a powdered methionine, threonine, valine free, low isoleucine amino acid supplement.

Indications

For the dietary management of Methylmalonic Acidaemia and Propionic Acidaemia (MMA/PA) from birth onwards.

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

Preparation Guidelines

To be determined by the clinician or dietitian. Can be used in the dietary management of MMA/PA in a variety of ways:

- Mixed in with protein substitute
- Added to modular feeds.
- Incorporated into other permitted food or drink.

The product should be freshly prepared and consumed immediately; if this is not possible, then all prepared product must be tightly covered and consumed within 4 hours if kept at room temperature, or within 24 hours if refrigerated. Shake before use.

For bottle fed infants:

1. Sterilise feeding equipment according to manufacturer's instructions.
 2. Follow the feed preparation instructions provided by your dietitian or clinician.
- Use immediately and discard any remaining product after 1 hour.
Do not reheat once feeding has started.

MMA/PA amino5 (6g) = 5g PE

IMPORTANT NOTICE

Use under medical supervision.

Not suitable for use as a sole source of nutrition.

Suitable from birth onwards.

Must only be given to individuals with MMA/PA.

Diet must be supplemented with natural protein, water and other nutrients in prescribed quantities to supply methionine, threonine, valine, isoleucine, fluid and general nutrition requirements.

For enteral use only.
