

Vitabite™

ACBS GMS PBS

Description

Food for special medical purposes.

Vitabite™ is a low protein, chocolate flavoured bar, with fat and carbohydrate. For the dietary management of inborn errors of protein metabolism and kidney disease.

Indications

Vitabite is designed for the dietary management of inborn errors of protein metabolism and kidney disease. Suitable from 1 year of age onwards.

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

Preparation Guidelines

Vitabite is a versatile product that can be easily incorporated into the diet in a variety of ways e.g. it can be melted and used to coat permitted cakes, cereal and fruit. Serving suggestions are available on request.

IMPORTANT NOTICE

Use under medical supervision.

Not for use as a sole source of nutrition.

Suitable from 1 year of age onwards.

Must only be given to individuals with proven inborn errors of protein metabolism or kidney disease.

For enteral use only.
