

ACBS GMS PBS

Description

Food for special medical purposes

K.Vita is a thickened liquid containing a specific blend of medium chain triglycerides (MCT), for the dietary management of drug resistant epilepsy.

Indications

K.Vita is for the dietary management of drug resistant epilepsy for use in adults and in children from 3 years of age.

Recommended Intake and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

Preparation guidelines

Shake well before use.

Best served at room temperature.

IMPORTANT NOTICE

Use under medical supervision.

Suitable from 3 years of age.

Not suitable for use as a sole source of nutrition.

Not suitable for use during pregnancy and lactation.

Not suitable for individuals unable to metabolise MCT, for example, those with medium chain acyl-CoA dehydrogenase deficiency (MCADD).

For enteral use only.

Use as directed by the clinician or dietitian.

- Introduce K.Vita slowly and in measured amounts.
- Always take with food.
- Take regularly throughout the day preferably at meal times.
- Consume as part of your usual diet but avoid foods and beverages high in sugar.
- Suitable for tube feeding.
