ACBS ☒ GMS ☒ PBS ☒

Description

Food for special medical purposes.

PKU squeezeTM is an apple & banana flavoured ready-to-feed phenylalanine free* protein substitute containing essential and non-essential amino acids, carbohydrate, sugar, vitamins, minerals, trace elements, arachidonic acid (ARA) and docosahexaenoic acid (DHA).

Indications

PKU squeeze is for use in the dietary management of Phenylketonuria (PKU) from 6 months to 10 years of age.

Recommended intake and administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

PKU squeeze (85g) = 10g PE

Preparation Guidelines

Shake well.

Consume from spoon or direct from pouch.

Roll and squeeze to empty pouch.

Water or permitted drinks should be taken after PKU squeeze.

Any remaining product; if not refrigerated must be discarded within 1 hour.

IMPORTANT NOTICE

Must only be given to children with PKU under medical supervision.

Not suitable for use as a sole source of nutrition.

Suitable from 6 months to 10 years of age.

Diet must be supplemented with natural protein, water and other nutrients in prescribed quantities to supply phenylalanine, fluid and general nutritional requirements.

For enteral use only.

Infants and young children should be supervised at all times when feeding.

Regular teeth cleaning is recommended.
