

What is K.Flo?

K.Flo is a palatable nutritionally complete feed in a 4:1 ratio of fat to carbohydrate and protein with a vanilla flavour for the dietary management of epilepsy, neurometabolic disorders or other conditions requiring a ketogenic diet.

K.Flo is ready to use, each 250ml bottle contains:

K.Flo

- is for use from 3 years of age onwards.
- can be taken orally or via an enteral feeding tube.
- is suitable for use as a sole source of nutrition or to supplement dietary intake.

Tips for giving K.Flo via an enteral feeding tube

An enteral tube feed can be given in a variety of ways – as a bolus or via a feeding pump. Your dietitian or ketogenic team will recommend a feeding regime suitable for you.

- **K.Flo** is ready to use – no mixing or shaking is needed.
- Unscrew the lid, peel the foil top off the bottle and pour the required amount into the feeding container or syringe barrel.
- The bottle can be resealed if **K.Flo** is unused and stored in the fridge for up to 24 hours or up to 6 hours at room temperature.
- Remember to flush the feeding tube with water after the feed.

K.Flo is a **Food for Special Medical Purposes** and must be used under medical supervision.

Allergens: Contains **milk**.
