Description

Althéra® is a hypoallergenic nutritionally complete powdered formula containing extensively hydrolysed whey protein, carbohydrate, fat, vitamins, minerals, trace elements and long-chain polyunsaturated fatty acids (LCPs); Arachidonic acid (ARA) and Docosahexaenoic acid (DHA). Packed under a protective atmosphere.

Presentation

450g tin (with a 4.4g scoop).

Indications

ACBS approved, prescribable on FP10 (GP10 in Scotland). Althéra® is for complete nutritional support from birth or supplementary feeding from 6 months and up to 3 years of age for the dietary management of cows' milk allergy and/or multiple food protein allergies.

Ingredients

Lactose (Milk), Maltodextrin, Vegetable Oils (Palm, Rapeseed, Coconut, Sunflower), Enzymatically Hydrolysed Whey Protein (Milk), Minerals (Calcium Glycerophosphate, Magnesium Chloride, Calcium Chloride, Potassium Phosphate, Sodium Phosphate, Calcium Phosphate, Potassium Chloride, Potassium Citrate, Ferrous Sulphate, Zinc Sulphate, Copper Sulphate, Potassium Iodide, Sodium Selenate, Sodium Chloride), Emulsifier (E472c), Vitamins (C, E, Niacin, Pantothenic Acid, B2, A, B1, B6, K1, Folic Acid, D3, B12, Biotin), Crypthecodinium Cohii Oil (DHA), Mortierella Alpina Oil (ARA), Choline Bitartrate, Taurine, L-Histidine, Myo Inositol, L-Carnitine.

Administration and Dosage

Feeding Table	Quantity per meal		Meals per day
	Water (ml)	No. of scoops*	
Age of Infant			
1-2 weeks	90	3	6
3-4 weeks	120	4	5
2nd month	150	5	5
3-4 months	180	6	5
5-6 months	210	7	5
From 5th (7th) month**	210	7	3-4

* Note: Use only the enclosed scoop.

** A healthcare professional should be consulted before introducing other food to a baby's diet.

Preparation Guidelines

The standard dilution of 13.2% is made by adding 1 level scoop of Althéra® (approx 4.4g) to 30ml of water (approx 1 fluid oz). Incorrect storage, handling, preparation and feeding can eventually lead to adverse effects for the health of a baby.

1. Wash hands well.

2. Wash bottle, teat and cap.

3. Sterilise equipment (by boiling for 5 minutes or with a cold water sterilising solution).

4. Boil drinking (tap) water. Allow to cool for no more than 30 minutes.

5. Pour exact amount of water (see feeding table), into the sterilised bottle, carefully to avoid scalds, the water is hot.

6. Add exact number of level scoops for age of baby.

7. Place the sterilised teat and cap on the bottle and shake well until powder is fully dissolved. Cool bottle under cold running water until lukewarm. Test the temperature by shaking a few drops onto the inside of your wrist.

8. Close tin tightly after each use and store in a cool dry place.

Shelf life

Shelf life of 24 months from date of manufacture.
Use within 3 weeks of opening.

Important Notice

A food for special medical purposes.
Mothers should be encouraged to continue breastfeeding even when their infants have cow's milk protein allergy. This usually requires qualified dietary counseling to completely exclude all sources of cow's milk protein from the mothers' diet. If a decision to use a special formula intended for infants is taken, it is important to give instructions on correct preparation methods, emphasising that unboiled water, unsterilised bottles or incorrect dilution can all lead to illness. Formula for special medical purposes intended for infants must be used under medical supervision.

For oral/enteral use only.

Important feeding information

Do not add any extra powder or water to make feeds stronger or weaker. Using too much or too little powder can make a baby ill. We recommend preparing each feed in individual bottles when required, feed immediately. If there is any unfinished infant milk left after feeding, throw it away.

Always hold the baby while feeding.

Never leave the baby alone during feeding as there is a risk they might choke.

New

EASY TO STORE SCOOP

Easy to store scoop is an innovative and unique tin design with a separate storage compartment for the scoop - bringing **added safety, hygiene and convenience** to caregivers and patients.

1 Pull the safety peel and open the lid

2 Hold the spoon and pull open the foil

3 Scoop and level the powder

4 After use, store the spoon in suspension inside the tin as shown

5 Close the tin tightly with the lid
